

How to use JAR and DEMO programming

- 1.Copy MyPrinter#3 and PrinterLibs into a separate file.
- 2.Using ADT's File-> New->Project -> Android Project From Existing Code put these two project into ADT.
- 3.If develop the program by yourself,you want to use library,in this project's Add Jars property page you can choose Add Jars.

At the same time, ensure Order and Export has chosen the printerlibs.jar.

4. Specific functions, please combine the command list understanding. Each Activity are separate. If you want to achieve one of the functions, only to check what corresponding Activity code had done.
